Smart Vento 3

- Smart wireless technology
- Dolby Audio & DTS Digital Surround
- Digital sound optimization
- Bluetooth

Active and wireless

For music and movie

With the new Smart Vento 3 and Smart Vento 9 you can bring high-end sound into your own four walls even more easily. The active loudspeaker sets offer wireless signal transmission between the speakers with 24-bit internal signal processing. Thanks to the many connection options and the powerful output stages with 350 watts per speaker, the Smart Vento 3 requires no external amplifier.

High-End Sound - Easy as never before

Are you looking for excellent sound? With a lot of power and pressure in the low pitches, balance in the mids and accurately resolved highs? Then the Smart Vento 3 is the right choice for you. This compact speaker has a lot to offer: the very best technical ingredients for a surprisingly mature sound image, superior workmanship and feel, and of course features that go far beyond those of a conventional speaker. Our fully active Smart Vento 3 delivers high-end sound with wireless signal transmission between the speakers. Thanks to internal 24-bit signal processing, the wireless connection always operates precisely and without interference. 350 watts of power amplifier output per speaker provide outstanding dynamics - for great listening pleasure within your own four walls.

Real sound from compact speakers

The compact Smart Vento 3 are well equipped and make commissioning very easy. A variety of analogue and digital inputs are available to connect any source device to the smart speakers. Whether you prefer the XLR or Cinch version is entirely up to you. On the digital side, you can select one of the optical or coaxial inputs or connect a computer to the Smart Vento 3 via USB input with XMOS. The best sound quality is also guaranteed when playing back via Bluetooth thanks to apt-X decoding. To enable you to start playing music immediately after unpacking, we also supply a selection of cables.

Highlights of the Smart Vento 3

The Smart Vento 3 looks and sounds great. This is due in part to our high-sounding active modules, which provide each speaker with an abundance of power. The Class D amplifiers work particularly effectively and keep a cool head in every situation. For unbridled dynamics, each speaker contains a 180 mm titanium bass-midrange driver, which can play down very low thanks to bass reflex support and long-stroke wave surround. Our 25 mm dome tweeter with ceramic diaphragm, powerful magnet system and a transmission front plate that optimises the dispersion characteristics plays up to the highest heights. The integrated decoding also makes it possible to process all currently available sound formats, turning the Smart Vento 3 into a fully-fledged home cinema system.

Real gems

Our Smart Vento 3 look simply great in their white or black housings. The high-gloss finish and the elegantly curved side panels make the compact speakers look particularly classy. In addition, the surfaces, which are painted, sanded and sealed in eight steps, impress with their perfect finish. Due to their design, the cabinets are particularly low-resonance and thus provide the best possible working conditions for the drivers used. High-quality titanium and ceramic are used as diaphragm materials, ensuring enormously balanced, precise and detailed music reproduction. The Smart Vento 3 sets visual highlights with its screwless diamond-cut aluminium rings.

CANTON

Type	Compact speaker
Engineering Principle	2-way bass reflex
Nom. /Music power handling	80 / 150 watts
Systempower	350 watts per speaker
