

Experience the Alyssa SE

ALYSSA SE

The Alyssa SE is the most refined expression of the Alyssa platform—hand-built, custom-tuned, and engineered without compromise for listeners who want exceptional resolution, tonal purity, and lifelike spatial presentation. Designed to reveal the full emotional impact of music, it delivers transparency, speed, and realism with effortless authority.

Key Features

- High-purity silver internal wiring
- Litz air-core inductors
- Silver-foil capacitors throughout
- Point-to-point hand-wired crossover
- Individually tuned by founder Michael Levy

Why Alyssa SE

- Silver signal path for maximum detail and resolution
- Point-to-point hand-wired crossover for greater musical coherence
- Custom tuning for true-to-life imaging and depth
