

STRAIGHT WIRE

CRESCENDO II

ANALOG AUDIO INTERCONNECTS

Advanced Helix Design
Authentic, Layered Soundstage

Super Foam Polypropylene Insulation
Holographic Presentation

Certified Compressed Copper (CCT)
Superlative Bass and Midrange

It has taken much effort over a few years to improve upon the highly respected, reference level **Crescendo II** Interconnect. We changed the dual insulation (Foam PTFE and Foam Polypropylene) to a new proportion and made corresponding changes to the inner foundation. Black Delrin caps are employed instead of the previous metal ones for mechanical advantages. The result is a more revealing, yet effortless, presentation of subtle musical details and holographic soundstage. **Crescendo II** is available with RCA or XLR terminations.

LEVEL 4 - PREMIUM

REFERENCE LEVEL FOR UNSURPASSED MUSICAL SATISFACTION
