

The Skybar™ Satellite features two front firing 3" full range drivers and a 1" titanium dome pivoting tweeter for side or surround channels. A third 3" reflecting speaker is mounted into an angled channel to direct the waveform towards a wall or ceiling for more diffuse rear or height channels. The Skybar™ Satellite can be configured to provide only surround channel information, or both surround and rear or height channel information for a fully immersive home theater experience. Reconfigurations are accomplished by connections on the back panel of either Skybar™ LCR or Skybar™ Satellite. They easily allow single channel or multi-channel configuration with the flip of a switch. Each speaker features a fully sealed high grade MDF enclosure, precision punched steel baffle for maximum rigidity and come with a bezel-less paintable magnetic grill. TDG Audio Skybar™ LCR and Skybar™ Satellite, 1, 2, 3, 5, 7 channel configurations and more from just 2 models.

Our team is genuinely excited about music and still gets a thrill when we listen to our favorite music perfected on one of our newest creations. Of course each of our speakers is backed by our **LIFETIME WARRANTY**.
