What makes the Vento .2 even better

Our premium Vento 886.2 floorstanding loudspeakers look simply stunning in their elegantly designed cabinets with flawlessly painted surfaces in a high-gloss finish. They impress with harmonious proportions, rounded cabinet edges and curved side panels. This makes our Vento 886.2 a jewel in any living room ambience. The bass-reflex floor-standing loudspeakers impress with their excellent sound characteristics and are ideal for all musical genres thanks to their balance. Only high-quality technical components have been incorporated into the attractive 3-way bass reflex speakers: this ensures the incomparably good Canton sound and an enormously high level of reliability.

High-End Sound - Easier than ever

In addition to their elegance, the Vento 886.2 score points for their high level of technical maturity: in it we combine more than 45 years of experience in loudspeaker development and the technical and sonic genes of our best loudspeakers. The cabinets are constructed from low-resonance multi-layer laminate, are stiffened several times on the inside and equipped with high-quality internal wiring. Two 174 mm woofers each provide powerful bass, giving the slim floorstanding speakers an enormous low-frequency foundation. Thanks to the double-cone titanium cones and wave surround technology, the Vento 886.2 remains precise and faithful to the sound even at high volumes. The ideal playing partner for the two bass specialists is the 174 mm titanium midrange driver with large cone area and suspension in the triple-folded wave surround. Our top-class 25 mm ceramic dome tweeter perfectly complements the dynamic driver trio with its detailed and accurate sound image.

Outstanding technology

Like all our loudspeakers, we also manufacture the Vento 886.2 in our factory in Weilrod in the Taunus region. This enables us to maintain the necessary quality standards, minimise tolerances, eliminate any faults and meet the high sound demands placed on our loudspeakers. The loudspeaker cabinets of the Vento models are refined in numerous work steps - elaborate manual work results in perfectly finished surfaces. Our 3-way premium loudspeakers are available in the "high-gloss versions" with white or black lacquering as well as in

CANTON

noble cherry real wood veneer. An additional visual highlight of the Vento 886.2 are the seamless diamond-cut aluminium rings in front of the high-quality drivers. Thanks to the downfire bass reflex system and the modern base construction with elegant bevels and spacers in cone shape, the Vento 886.2 looks stunningly good - simply beautiful all around.

The Vento Family

Are you looking for your personal home cinema multi-channel dream for the ultimate in movie fun within your own four walls? The Vento speakers make it possible! Our attractive Vento 886.2 can be combined with other models in the Vento family to suit your personal preferences and system requirements. The result is a highly dynamic and powerful multi-channel system that meets all your demands for sound quality and level stability with playful ease. From the flat wall speaker (Vento 816.2) to powerful compact speakers (Vento 826.2 and 836.2) and Dolby Atmos speakers (AR-800), to additional floorstanding speakers (Vento 876.2 and 896.2) and a potent centre speaker (Vento 866.2 Centre), you will find perfect companions to complement your Vento 886.2.
